

## HiPP HA Germany Hypoallergenic Stage 1 Combiotic Infant Milk Formula – (600g)

0-6 Months

### PREPERATION INSTRUCTIONS

Preparation for all powdered formulas (also consistent with US FDA guidelines):

1. Boil water freshly for each of baby's meals and allow to cool down to 120 degrees Fahrenheit (50 °C) before mixing with formula powder.
2. Pour in 2/3 of the necessary amount of boiled water into a clean and sterilized bottle.
3. Using the scoop provided with your box of formula (note that spoon sizes vary by brand and even lot), add the correct number of leveled scoops of powder (1 leveled scoop of powder per 1oz / 30ml of water).
4. Close the bottle with the nipple and cap and vigorously shake until all the powder has completely dissolved.
5. Add the remaining water to the bottle and shake again.
6. Cool to drinking temperature (approximately 98 degrees Fahrenheit or 37 °C) and ALWAYS test the temperature of the milk before feeding to avoid scalding or burning your little one.

#### TIPS:

- ✓ Once you have opened the inner foil bag containing your formula, you should use within 2 or 3 weeks.
- ✓ Avoid storing in area of high heat or humidity
- ✓ If mixed formula is not consumed within an hour, you should discard it.
- ✓ Do not microwave bottles or formula
